TECHNICAL SKILLS

Backend

PHP · Laravel · Node.js
NestJS · Python · Java
Spring Boot · CodeIgniter

Frontend

Vue.js · React · Angular
jQuery · HTML/CSS

AI & Voice

Claude API · OpenAI API
MCP · RAG / Vector DB
Pinecone · ElevenLabs
Deepgram · Pipecat · Vapi

Automation & Integrations

n8n · GoHighLevel · Twilio
Stripe · Stripe Connect
Yelp API · Slack · HubSpot
Zoho · ClickUp · Asana

Databases

MySQL · PostgreSQL
Supabase · MongoDB · Redis
Oracle · SQL Server

DevOps & Testing

Docker · Jest · Cypress
Swagger

EDUCATION

BSc. Computer Science & Engineering

Northern University Bangladesh
2017 · CGPA 3.30 / 4.00

OPEN SOURCE

Laravel-n8n-mcp-server

54-tool MCP server bridging Laravel & n8n workflows

Laravel-quickbooks-mcp-server

49-tool QuickBooks MCP — OAuth 2.0, multi-tenant

Laravel-notion-mcp-server

MCP server for Notion integration via Laravel

Larastreamer

Laravel video streaming package

Laravel-EWS-Mail-Server

Email via Exchange Web Server

GHL WP Bridge

WordPress GoHighLevel plugin

STRENGTHS

- AI Platform Architecture
- System Design & Scalability
- Team Leadership & Mentoring
- Business-to-Technical Analysis
- Agile / Remote Collaboration

PROFESSIONAL SUMMARY

AI platform architect and full-stack lead with **10+ years** of experience building production SaaS systems, voice AI infrastructure, and intelligent automation pipelines. Deep hands-on expertise in **MCP server development**, **RAG / vector search**, multi-tenant SaaS architecture, and orchestrating AI agents via n8n and the Claude & OpenAI APIs. Track record of leading distributed engineering teams and shipping complex, integrated products end-to-end.

PROFESSIONAL EXPERIENCE

Head of Development

Sulus.ai · Full-time

Apr 2026 – Present

- Appointed as Head of Development at Sulus.ai — a platform originally built during tenure at Lighthouse Graphics, now operating as an independent entity.
- Overseeing all engineering functions, product architecture, and technical strategy across the platform.

Software Development Lead

Lighthouse Graphics · Remote

May 2023 – Apr 2026

- Architected and led development of **Sulus.ai** — a white-label, multi-tenant SaaS platform for AI voice agents, built on Laravel, Vue.js, Supabase, and Pinecone vector search.
- Designed and published MCP (Model Context Protocol) server packages bridging Laravel with n8n automation and QuickBooks — enabling no-code AI orchestration for enterprise clients.
- Built a conversational AI agent system allowing end users to configure voice assistants via chat, wired through n8n with runtime Sanctum auth and Claude API.
- Architected a knowledge base (KB) system for AI voice assistants using Pinecone (cosine, 1536-dim), OpenAI embeddings, and Supabase — with full tenant isolation by reseller.
- Built **The Hive** — an internal operations platform for Lighthouse Graphics, integrating OpenAI, Slack, ClickUp & GoHighLevel to auto-generate meeting summaries, action items, and project scopes.
- Led and mentored a distributed engineering team across architecture, development, and cloud deployments.

Sr. Software Engineer & Team Lead

SIMEC System Limited

Oct 2019 – May 2023

- Architected and delivered **eDP** ([edp.gov.bd](#)) — a government defense procurement platform for DGDP, Bangladesh Ministry of Defense, built on a Java Spring Boot microservices architecture with React frontend and Oracle DB.
- Delivered additional enterprise systems including e-commerce platforms, HR management, and school management systems.
- Translated business requirements into technical specifications and system architecture; managed team tasks and code reviews.

Software Engineer

Gugu Corporation, Japan · Remote · Part-time

Jun 2018 – Oct 2019

- Developed SaaS-based, test-driven web applications to Japanese quality standards.

Software Engineer

Adbox Bangladesh

Aug 2018 – Nov 2019

- Built and integrated all major telecom billing systems with VAS (Value Added Service) products for Robi & Banglalink.
- Maintained and enhanced existing Telco VAS products; integrated bKash payment gateway.

Web Developer

Krazy IT · Bangladesh Wing

Jan 2016 – Mar 2018

- Built data-driven web apps serving hundreds of concurrent users for Australian clients; developed backend APIs for Android & iOS mobile applications.
- Developed an Inventory Management System and various custom business applications tailored to client requirements.

KEY PROJECTS

Sulus.ai

White-label multi-tenant SaaS for AI voice agents — reseller model, GHL CRM sync, Pinecone KB, n8n automation, and voice infrastructure.

Laravel · Vue.js · n8n · Supabase · Pinecone · GHL

The Hive

AI platform for meeting summaries, action items, and scope generation. Includes Yelp webhook integration — receives business leads/queries and responds autonomously with AI.

Laravel · NestJS · React · OpenAI · GHL · Slack · Yelp API

eDP — Defense Procurement

Government procurement platform for Bangladesh DGDP (Ministry of Defense) — microservices, multi-module, high-security.

Java · Spring Boot · React · Oracle · Redis

AalapAI.com

Personal SaaS platform connecting WhatsApp Business numbers to AI agents for automated customer conversations.

Laravel · MySQL · OpenAI API

DSS HRMS

Full-suite HR management system — payroll, attendance, leave management & loan modules.

Laravel · Angular · MySQL

LearnWithAI.BD

Bangla-first AI-powered programming mentor platform targeting Bangladeshi developers — waitlist beta launched.

Laravel · Vue.js · Inertia.js · Claude API
